FIELD ADJUSTABLE Standard

APP-ADJUSTABLE CCT & LUMEN

Trim to the desired output lumen by percentage, or select light color temperature by using the smart device APP.

OUTPUT & CCT FIELD ADJUSTABLE

CCT can be adjusted to 3000/3500/4000/5000K, and lumen output (high trim) can be set to as low as 50%.

EMERGENCY BACKUP Optional

EMERGENCY BACKUP (-EM)

EMERGENCY BACKUP OPTION

RKTN series emergency backup models works out of the box to save time and cost in the installation. When there is a power outage, the emergency backup driver and battery will power the LEDs of RKTN to an brightness of 1,200 lumen for at least 90 mins.

Note: -EM option will not provide battery backup for RKTN intergrated bluetooth networked components, a RTC device (purchased separately) is recommended per zone if scheduling function is required, otherwise a local time sync (using the smart device APP) will be required after each power outage.

CONTROL Standard

Networked Lighting Controls

All models of RKTN are Bluetooth Networked Control (NLC) Enabled.

Network Lighting Controls (NLC) offer Luminaire Level Lighting Control (LLLC) based on Bluetooth-enabled Mesh Networking of Luminaires. Individual addressability enables luminaires to be communicated with each other within the zone/network. Luminaires can be grouped, trim and controlled by using the smart device app or connected wall switches. Scheduling, scene and sensors can be added for automation among the lights within the zone/group.

iOS/Andriod APP will be used to commissioning or customize settings of the networked controls.

(-WBP) Optional plug-and-play PIR occupancy and daylight harvesting sensor.
